

Faculty of Engineering and Design 2026 Part IV Project Final Report Rubric:

Assessment Criterion	Typical Report mapping	Weighting	A Range (High quality) 100 – 80%	B Range (Good) 79 – 65%	C Range (Satisfactory) 64 – 50%	D Range (Poor) 49 – 0%
A: Literature & Field Knowledge “What is known or has already been done that is relevant” LO 1	Introduction, Literature review, Methodology, Discussion.	10%	The report references relevant literature and demonstrates a strong, intellectually mature understanding of the research field and related work. Through: • Retrieval and assessment of the relevant literature • Clear and insightful connections across the field • Strong evaluation of relevance and implications of prior work	The report demonstrates a good understanding of the research field. Through: • Retrieval and assessment of a good portion of the relevant literature • Identification of some relationships across the field • Reasonable evaluation of relevance	The report demonstrates a basic understanding of the research field. Through: • Descriptive use of a limited selection of relevant literature, or use of some inappropriate literature • Weak connections across the field • Limited evaluation of relevance	The report demonstrates significant weaknesses in understanding the research field. Through: • Minimal or inappropriate use of literature, with poor understanding of key concepts • No clear connections • No meaningful evaluation
B: Problem Definition & Research Framing “What did I want to do, and how does it fit with existing knowledge/ practice” LO 2	Research Question, Aims and Objectives	10%	The report demonstrates a strong ability to frame and define the research problem. Through: • Strong critique of literature identifying clear and significant gaps (where applicable) or clear logical progression from literature to research direction • Clear, coherent problem statement demonstrating strong knowledge and understanding of subject matter • Well-formulated and aligned research questions and hypotheses	The report demonstrates a good ability to frame and define a research problem. Through: • Clear critique of literature identifying gaps (where applicable) or some logical progression from literature to research direction • Well-developed problem statement • Appropriate research questions and hypotheses	The report demonstrates a basic ability to frame and define a research problem. Through: • Limited critique of literature identifying gaps (where applicable) or limited linkage from literature to research direction • Basic or unclear problem statement • Partially developed research questions	The report demonstrates significant weaknesses in framing and defining a research problem. Through: • Little or no critique with failure to identify gaps or lack of linkage from literature to research direction • Missing or unclear problem statement • Absent or inappropriate research questions

C: Study Design “What I planned to do, and why this plan makes sense” LO 3	Literature review, Methods	20%	The report demonstrates a strong justification (through theory and / or best practice) of study design. Through: • Strong synthesis of theory, methods, and procedures • Clear coherence between theory, methodology, and research / study questions • Rigorous study design and method development • Well argued choice of data (where applicable) • High-level proficiency in tools and hardware/software co-design (where applicable)	The report demonstrates a good understanding of theory and study design. Through: • Good synthesis of theory and methods • Clear alignment with research questions • Well-developed research / study design and method development • Good discussion of choice of data (where applicable) • Competent use of tools and integration (where applicable)	The report demonstrates a basic understanding of theory and study design. Through: • Limited synthesis of theory and methods • Partial alignment to research questions • Workable but underdeveloped design • Basic discussion of choice of data (where applicable) • Basic or inconsistent tool use (where applicable)	The report demonstrates significant weaknesses in theory and study design. Through: • Incorrect or minimal use of theory and methods • Poor alignment with research questions • Flawed or inappropriate design • Lack of discussion of choice of data (where applicable) • Ineffective tool use (where applicable)
D: Study Execution, Findings & Evaluation “What I did, what were my results, and how I analysed my findings” LO 4 & 5	Methods, Results, Discussions	30%	The report demonstrates a strong creative ability / originality to develop / apply methods and evaluate the findings. Through: • Rigorous and efficient execution of experiments / models / simulations with sufficient scope and breadth • Advanced application of data analysis (where applicable) • Well formulated arguments based on strong and sustained evidence / findings; • Diagrams, graphs and tables, etc included where appropriate to support evaluation • Critical interpretation, comparison with literature, and evaluation of validity.	The report demonstrates a good creative ability / originality to develop / apply methods and evaluate the findings. Through: • Effective execution of experiments / models / simulations with adequate scope • Appropriate use of data analysis techniques (where applicable) • Clear arguments mostly backed up with evidence / findings • Some diagrams, graphs and tables, etc included to support evaluation where appropriate • Logical interpretation with some evaluation of validity	The report demonstrates a basic creative ability / originality to develop / apply methods and evaluate the findings. Through: • Inconsistent execution of experiments / models / simulations • Basic use of data analysis techniques (where applicable) • Understandable but sometimes unclear presentation • Some lack of supporting material for evaluation, where diagrams, graphs and tables would have been helpful • Descriptive interpretation with limited evaluation	The report demonstrates significant weaknesses in development / application of methods and evaluate the findings. Through: • Poor or incomplete execution • Minimal or incorrect analysis techniques / models / simulations • Disorganised use of data analysis techniques (where applicable) • Significant gaps in arguments, with lack of diagrams, graphs or tables to support evaluation • Little or no evaluation

E: Interpretation, Contribution / Impact “Discussion: What my study showed, and why does it matter?” LO 8	Abstract, Discussion, Conclusion	25%	The report demonstrates a high level of critical thinking , a strong ability to interpret findings and meaningful contribution to knowledge or real-world connection. Through: • Highly knowledgeable, logical, and expert interpretation • Meaningful contribution to existing knowledge or clear connection to real-world problems (as applicable) • Strong articulation of significance, limitations, and improvements • Claims are proportionate to findings, contributions, and impact • Insightful conclusions and recommendations	The report demonstrates good level of critical thinking , ability to interpret findings, and some contribution to knowledge or real-world connection. Through: • Logical and coherent interpretation • Clear contribution to knowledge or connection to real-world linkage articulated (as applicable) • Good articulation of significance • May have minor overstatement of findings, contributions, or impact • Reasonable conclusions	The report demonstrates basic level of critical thinking , ability to interpret findings, and limited contribution to knowledge or real-world connection. Through: • Descriptive interpretation • Limited contribution or minimal real-world connection articulated (as applicable) • Weak or exaggerated articulation of importance • May overstate findings, contributions, or impact • Basic conclusions	The report demonstrates significant weaknesses in critical thinking, ability to interpret findings, and no contribution to knowledge or real-world connection. Through: • Little or no interpretation • No contribution to knowledge or real-world linkage (as applicable) • No or exaggerated articulation of importance • Significantly overstates findings, contributions, or impact • Missing or unsupported conclusions
F: Technical Writing & Research Communication LO 6	Entire report	5%	The report demonstrates strong proficiency in technical communication. Through: • Clear, coherent, and professionally structured report • Precise and appropriate technical language • Logical flow and organisation • Complete and well-organised research compendium • High standard of presentation with no significant errors	The report demonstrates good technical writing proficiency. Through: • Clear and well-structured writing • Appropriate technical language • Logical organisation • Complete supporting material • Minor errors only	The report demonstrates basic technical writing proficiency. Through: • Generally understandable writing • Inconsistent technical language • Some structural issues • Incomplete support material • Noticeable errors	The report demonstrates significant weaknesses in technical writing. Through: • Unclear or poorly structured writing • Incorrect language use • Disorganised presentation • Missing supporting materials • Frequent errors affecting clarity
